
campustrade/cli 界面
Shell
-token: str
+run()
只依赖容器
campustrade/services 服务层
Application（context.py）
+store / journal / auth
+items / audit / trade
+moderation / stats
ServiceBase
#store / #auth / #journal
#actor(token): User
TradeService
+cancel / confirm / finish
+reserve(token, id, reqId)
+autoFinishDue(now): list
ModerationService
+submitReport(token, id, type)
+handle(token, reportId, action)
AuditService
+pending(token): list
+approve(token, id, ver)
+reject(token, id, reason)
AuthService
+register / login
+authenticate(token): User
StatsService
+sellerSummary(token, ...)
+siteSummary(token, ...)
复用状态校验
复用下架校验
ItemService
+createDraft / updateItem
+submitAudit / offShelf
+search(cond, sort): list
记录登录
JournalService
+record(operator, action, ...)
+query(actor, ...): list
+notify / inbox(...)
